**OPTEL™**
Traceability technologies for a better world

# Global life science company
## uses OPTEL's **L4 solution**
## for its track and trace

## CUSTOMER PROFILE

Our customer is a leading international company and a renowned player with core competencies in the LifeScience fields of Healthcare and Agriculture. It has a long-standing reputation for pioneering innovative solutions and ensuring a diverse set of products all supported by expert guidance and advice.

## CHALLENGES

For its Turkey site, the customer was in search of a comprehensive track and trace solution that would efficiently address their specific needs. Firstly, they requested a solution that could effectively and seamlessly generate serial numbers to enhance their traceability and supply chain visibility. The desired system needed to be capable of handling large volumes of data without compromising on speed or accuracy. Secondly, they emphasized the importance of platform integration with their existing systems ensuring complete compatibility and interoperability.

## SOLUTION

To address those specific needs, OPTEL's L4 Verify software was the perfect solution.

Beyond the generation of serial numbers, OPTEL's L4 Verify software could enable significant benefits for the customer:

- Ensure compliance with current country-specific norms and regulations, ensuring that operations align with established legal standards.
- Implement a cloud platform for efficient serial number management
- Establish direct connection with serialization applications on the production line.

> Verify:
> A powerful serialization and traceability solution for L4-L5.

## CONCLUSION

We are delighted to share that the Verify software is successfully operational, demonstrating flawless performance without any reported technical issues.

Experience best-in-class performance with our single-tenant software, featuring a fixed-cost model, robust security measures, and fast query response.
